CHAPTER – I

VILLAGE STUDY ASSIGNMENT- AN INTRODUCTION

The administrative plan, work plan, and necessary decision-making for good governance is closely linked to social, economic, cultural and geographical features. The infrastructure available in the village too affects the quality of life of rural population. Different forms of discrimination existing at different levels and among different sections of society in the village are identified as one of the major difficulties in achieving ‘inclusive development’.

The Village Study Assignment (VSA) is designed in a way that enables Public Administration professionals i.e. the Officer Trainees (OTs) – to study rural realities very closely. It sensitises them towards the problems faced by the rural population, makes them aware of village level institutions and the impact of their functioning on rural population and facilitates in observing changes in life of rural population. Land, and the interaction of the human society with it, result in many economic, social, political and environmental concern. Therefore, appropriate and effective land administration is of crucial importance for sustainable development. The land administration schedule is designed to sensitize Officer Trainees towards the problems faced by the villagers and local revenue administration on a day to day basis. It also helps to understand the ground reality of land records, pattern of land disputes, issues of service delivery and public grievances, etc. Such learning of rural realities and functioning of different institutions can happen in different ways–through observation, talking to the village residents, conducting meetings with village residents, participating in the events taking place in the village, etc. To make your learning quasi-structured, a set of questionnaires covering almost all aspects of rural India focusing on village level institutions are given to you as tools to facilitate field work, data collection.

The process of primary data collection provides you an exposure to existing ground reality; village level institutions and implementation of various government programmes as also the life style of the village residents, their immediate concerns and priorities, felt needs, problems and solutions found for these problems, existing infrastructure, administrative decision-making processes and structures in operation for rural development. It is necessary to collect data scientifically, which passes tests of objectivity, reliability and authenticity. Based on the data collection and analysis, the conclusions that are drawn can help you to think about solving the problems and working towards achieving specific goals.

Objectives of the Village Study

1. To provide exposure to OTs to rural realities and enable them to understand the functioning of village level institutions, government programmes and important components of rural economy;
2. To capture experiences, expectations, and views of villagers on the functioning of various institutions and government programmes;
3. To assess the public service delivery at the village level and capture perception of villagers in provision of these services, and
4. To revisit the village and capture changes over 5–20 years in the areas of socio-economic infrastructure, physical infrastructure and administrative structures.
5. To study the ground level scenario of land administration and its functionality.
6. To understand of land related issues, success and failures of government programmes, capturing real time status of land records and allied activities.

**Selection of a Village**

This assignment is of a special kind. Each OT will (re)visit the village that has been visited by her/his seniors (i.e. the OTs who visited the village during 1990s) to capture changes over almost 5–20 years. This is called longitudinal survey\(^1\).

Please inform the BNYCRS regarding the districts within a month of joining your cadre. You will be allocated a village by BNYCRS in the District where you are posted for District training. This will usually be a village which was studied previously. enabling you to conduct Longitudinal study for preparing the Socio-Economic Report. As the villages are to be revisited after so many years, it becomes a purposive sampling.\(^2\)

---

**However, it might happen that you are posted in a district in which no Officer Trainee was ever trained in the past or the villages studied previously no longer exist due to amalgamation in urban area or a division of the district into numerous districts. In such cases, it becomes imperative to select a new village for study. The following process is to be applied for selection of the village.**

---

**Step 1:** Get a list of all census villages of the Block with their respective population. This will enable you to get a comprehensive idea of the villages for the study. You may refer to District Handbook, Census as well as Gazetteer of the respective district to do so.

**Step 2:** Select one village from the list of census villages based on the following criteria:

- The population size of the village should be between 1500 to 2000 (in case of hilly areas, the size of population can be lesser than the plain areas)
- The distance of the village from the main road should be more than 3 Kms
- Existence of Government schools (Primary, Secondary, High schools)
- Existence of Panchayati Raj Institutions
- Implementation of at least one of the Poverty Alleviation Programmes like NLM, MGNREGA, PMAY
- Existence of diversity of inhabitants like multiple castes/tribes and religions, APL & BPL families, divyang persons, out/in migrants, widows, destitute, single women, etc.
- Diversity of land use and ownership of land.

---

\(^1\) A **longitudinal survey** is a type of observational research study that involves repeated observations of the same variables over long periods of time to establish correlations. In this study, each OT will observe changes as mentioned in ‘research questions’.

\(^2\) It is more likely that a village which has been visited by your predecessor OT will be selected for your visit.
Thereafter discuss the details with your District Magistrate and shortlist a village which fulfils the above criteria. Intimate the same immediately to BNYCRS which will convey approval within three days of receipt of request.

**Note:** Prior approval of Centre Director, BNYCRS is essential before you take up any village. After allocation of a village by BNYCRS, no change shall ordinarily be entertained.

**Research Questions**

As this assignment focuses on functioning of different institutions and government programmes and capturing changes that may have taken place over 5–20 years, the main research questions will focus on different institutions catering to different sectors in the rural economy as follows:

(a) Exposure to different components/aspects of each institution and government programme
(b) Exposure to process, mechanism and outcome of each village level institution
(c) Capturing people’s experiences, expectations and views regarding performance of each village level institution and government programme
(d) Understanding components of rural economy and their linkages with village level institutions
(e) Capturing changes over 5–20 years viz. (i) socio-economic conditions of rural people, (ii) demographic features, (iii) infrastructure facilities and different sectors, (iv) assessment of existing poverty alleviation programmes and changes in government plans and schemes
(f) Capturing the status of land related activities viz. (i) computerization status, (ii) public service delivery, (iii) grievances redressal, (iv) assessment the role of Revenue Inspector as a local authority
(g) Assessment of annual income is essential for understanding the socio economic status of Households. This may be made based on observation on assets, occupation, employment, sources of income and productivity of crop and cattle etc.

**Data Collection, Analysis and Report Writing**

The Village Study Assignment covers a range of basic information that provides an overview of the village and the district, and focuses on important sectors such as education, sanitation, health care, land and land records scenario, Panchayati Raj Institutions (PRI), social welfare schemes, Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) and components of rural economy. Moreover, as part of longitudinal survey, you will be looking into changes in infrastructure, laws, policies and administrative structures.

You are facilitated through research tools, methods and sources of information to collect necessary data/information. Schedules are prepared in such a way that you will be able to prepare a pen picture at the end of each section/sector related questions. Some questions are close-ended i.e. with options given such as (i) ‘yes’ or ‘no’; (ii) type of soils with ‘alluvial’ or ‘black’ or ‘red’ or ‘laterite’, etc. From such close-ended questions,
you have to select appropriate answers and tick them. There are some open-ended questions. The answers to these questions will be descriptive. In some cases and in order to elicit necessary information, you may need to conduct an interview or a meeting or Focus Group Discussion (FGD). It is at your discretion as to which method is selected for gathering necessary information/primary data.

Different tools are to be used such as interview schedules, check-list/guideline questions, tabular formats, etc.; and the responses of the respondents could be used for analysis, interpretations, and report writing. There are some questions which are self-explanatory and you would be able to collect information directly; some questions will facilitate you to conduct Focus Group Discussion (FGD) for data collection. Some questions will lead to table generation after first level of data collection. While using these schedules you are encouraged to develop critical understanding on village level institutions and their functioning, government programmes and their outcome and components of rural economy.

The report of the field visits will be prepared based on the first-hand information that you have collected during your village visit through following types of schedules:

a. **Village Schedule**: This schedule will help you to collect macro/micro data of the village and its residents covering different sectors, village level institutions and their functioning and components of rural economy. This will enable you to analyse the socio economic background of the village and development over a period of time.

b. **Household Survey based on Household Schedule**

Total 20 households are to be surveyed. This will help you to get information about a household/family, its views on different aspects of life and different sectors, assessment of poverty alleviation programmes and social welfare schemes in the village. A combination of purposive sampling and random sampling is being adopted as per your objectives of the study. You must ensure that you select a combination of households, representing, different castes/tribes, female headed households, engaged in different economic activities. You are required to survey 20 households as indicated below:

<table>
<thead>
<tr>
<th>Households to be surveyed</th>
<th>No. of Households</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Beneficiaries of Social Welfare Schemes</td>
<td>03</td>
</tr>
<tr>
<td>(b) BPL Card Holder</td>
<td>02</td>
</tr>
<tr>
<td>(c) Antyodaya Card Holder</td>
<td>02</td>
</tr>
<tr>
<td>(d) Households owning land (for preparing Land Administration Report)</td>
<td>05</td>
</tr>
<tr>
<td>(e) Randomly selected Households</td>
<td>08</td>
</tr>
</tbody>
</table>

One of the households among the 3 households that have benefited from social welfare schemes, 2 households having BPL card and 2 having Antyodaya card could be used for preparing a case study on ‘poorest of the poor’.
Case Study on ‘Returns from Agriculture’ can be based on households owning land which will include the 5 households owning land that have been surveyed and any household among the others involved in agriculture.

The report of an Officer Trainee who has visited the village in 1990s is to be collected from the ‘B.N. Yugandhar Centre for Rural Studies’ for your reference and comparison. This will help you to identify changes in the last 5–20 years.

c. **Checklists and schedules**

The list of questions will help you to understand issues of poverty and agriculture in-depth through a person’s life story and conducting group meetings and individual interview. The last chapter guides you to use your data for presentation and to prepare a report, which includes a prototype reporting format and also tables as an output as part of this manual. You are encouraged to use photographs, maps, charts, graphs and other visuals for effective presentation of the report. Use of some anecdotes and quotes, especially in the case study, can make the presentation more effective and interesting.
SOCIO-ECONOMIC REPORT
CHAPTER – II
GUIDELINES & INSTRUCTIONS FOR DATA COLLECTION FOR SOCIO-ECONOMIC REPORT

Stages of Research

The usual stages of a research are –

(a) Developing objectives of the study
(b) Identifying research area and sharpening it with formulation of research questions
(c) Undertaking survey of literature and summarising secondary data
(d) Preparing tools viz. schedule, a check list of questions, a list of observation
(e) Identifying source of information viz. informants, respondents for each schedule
(f) Collection of primary data
(g) Exploring possibilities for triangulation of data
(h) Data entry–based on coding or template
(i) Generating output viz. tables, charts, graphs
(j) Analysis and interpretation of primary data and linking this analysis with the points that have emerged from survey of literature
(k) Evolving framework and structure for presentation/report
(l) Identifying different forms for presentation, i.e. tables, visuals (charts, maps, etc.), photographs, etc. and anecdotes and quotes
(m) Presenting data, analysis, interpretation and arriving at conclusions or presenting ‘challenges and way forward’.

Types of Data – Primary and Secondary

Data collection is mainly of two types viz. primary and secondary. The secondary data means it is collected earlier by someone through different sources and methods. The secondary data could be available in quantitative and qualitative forms. For example, Census data is quantitative data whereas District Gazetteer is descriptive as well as quantitative data. Quantitative data is usually expressed by numbers and other statistical methods, such as, per cent, equation and statistical formula, etc. Qualitative data refers to description that reveals ‘quality’ of what is captured as data, i.e. about/of situation/event/views or experiences, which is not expressed exclusively by number.
Primary data collection can take place in various ways; by using research methods and techniques as well as participatory learning methods. The OTs are facilitated through tools and techniques; methods and sources of information etc. to collect necessary data/information, for example,

- Snowball technique (asking one person and then getting names of say four persons who could provide necessary information and those four persons could suggest names of eight persons and the snowball gets thickened/number of information providers increases) for rapport building with a person or a community,
- ‘ice breaking’ conversation,
- Interviewing individuals,
- Conducting group meetings,
- Carrying out participatory exercises such as drawing maps of the resources/common properties/infrastructure available at the village.

With the use of necessary tools, such as interview schedule, check-list/guideline questions, tabular formats, etc. and research or participatory method/technique, the data is considered as ‘objectively collected data’ and ensures reliability, validity, and authenticity. Some participatory learning methods include transect walk, resource mapping, Venn or Chapati diagram, Matrix scoring, etc. help in capturing field realities in a semi-structured manner.

Some basic steps are described here for primary data collection through field visit and also about secondary data–sources including its use and role in understanding the existing scenario. Amalgamation of different data/information and exploring their inter-linkages is generally a part of ‘triangulation of data’.

**Sources of Secondary Data**

Identifying sources of information is one of the important parts of this assignment. Some information from the secondary sources such as Census data, NSS District Handbook, District Gazetteer, any published literature, etc. will be useful in preparing the report. The primary and secondary information need to be combined for report writing and also for cross-checking and verification of the data received from the field.

**Census Data:** A complete enumeration of the population that contains information on various variables like gender, age, marital status, sex, occupation, education, distance of residents from main roads etc. This also includes special series on socio-economic situation of the Scheduled Caste and Scheduled Tribes; migration series; etc. The District Handbook is also part of this data-set.

**National Sample Survey Organisation Data (NSSO):** It is the focal agency of Government of India for collection of statistical data in areas which are vital for development planning. This organisation conducts large scale sample surveys on subjects like household consumption and expenditure, employment and unemployment, health
care and medical services, etc. It also conducts annual survey of industry and status of estimation of agricultural production in India.

**Research Methods for Primary Data Collection**

You will be employing mainly six research methods for primary data collection that pass the test of objectivity, reliability and validity of the data and authenticity (authentic sources of information). The methods are –

(i) Interview  
(ii) Survey  
(iii) Focus Group Discussion  
(iv) Participatory Learning and Action  
(v) Observation  
(vi) Case study

1. **Interview Method**

The interview could be structured or unstructured. This method helps you to elicit information from a respondent to develop a holistic as well as in-depth understanding about a topic under discussion/study. The information collected through interview could be used for different purposes for example, as background information to the topic, for filling up household survey form, preparing a case study, etc.

An interview involves asking different types of questions–

(i) Close-ended (for example ‘yes’ or ‘no’, ‘select an option out of four’, etc.), and/or  
(ii) Open-ended questions (without providing pre-selection options),  
(iii) Probing wherever necessary to obtain both types of data i.e. quantitative and qualitative.

Different forms of interview include ‘informal conversational interview’, ‘guided interview’ (with a list of questions), and ‘standardized open-ended interview’. You have been provided with questionnaires and checklists (mostly with open-ended questions), which will help you to get information about specific topics. One of the major differences between ‘conversation’ and ‘interview’ as a research method is to maintain objectivity (not taking sides, not using value loaded terms, not passing on comments/value judgements, etc.). To ensure success, you are advised to be sensitive to individual situations and allow flexibility in different interviewing situations.

It is important for the researchers to familiarize themselves with questioning techniques before conducting interviews. Individual vary in their ability to articulate their thoughts and ideas. With good questioning techniques, researchers/ interviewers facilitate the respondents/interviewee and obtain quality data from them. In this method, it is assumed that the interviewer wishes to know or get information about the topic under study or behaves as if s/he does not know much about the topic under discussion. This is partly true. The interviewer carries a list of questions, which implies that the ground work on the topic is carried out and the seeker is getting more or in-depth information or confirms some pattern or trends through interview.
Interview Techniques:

(i) **Ask Clear Questions:** Any ambiguous question or a question consisting of a set of questions confuses a respondent and the information provided is vague. In order to get clear information, it is important to use words that make sense to the interviewees (suitable to local contexts, language and cultural usage, etc.) and each question is to be framed in a way that it is short, uses simple language and is easy to understand.

(ii) **Ask Single Questions:** One question at a time should be asked. This way of asking a question facilitates the respondent in thinking and answering it with a proper focus.

(iii) **Ask About Actual Data/Information and Experience Before Opinion and Feeling:** It is useful to ask questions about experience or behaviour before asking questions about opinions or feelings as it helps establish a context for the informants to express the latter. For example, you may ask about drop-out rate in the primary school and reasons for the same but asking a question such as ‘Why would a child come to school where the roof of the class room is leaking?’ is presumptive in nature and value loaded.

(iv) **Avoid Value Loaded Questions:** The ‘adjectives’ should be used sparingly, for example, ‘Why is your village very dirty?’ Instead, it could be asked, ‘What are the reasons for garbage being spread over various places in the village?’ It would certainly could elicit ‘proper reasoning’.

(v) **Don’t Put Words in the Mouth of the Respondents:** Avoid asking questions, such as ‘Don’t you think the Gram Pradhan is collecting money for getting a work done?’ If you wish to know whether a Gram Pradhan is corrupt or not, there are other ways to find out.

(vi) **Combine Close-Ended and Open-Ended Questions and Sequencing the Questions:** In order to avoid confusion, you could ask a mix of close-ended and open-ended questions. This refers to the efficient use of a special kind of questioning technique called ‘Funnelling’, which means asking questions that move from general to specific and from broad to narrow. If you are conversing about ‘poverty alleviation programmes–then and now’, you can sequence the questions according to time. Whether poverty has increased; reasons for it; forms of poverty, etc. could make a mixed set of questions.

(vii) **Probe & Follow-up Questions:** The purpose of questioning is to expand the response to a question; to increase the richness of the data being obtained, and to give clues to the interviewee about the level of response that is desired. In a way, a series of logical questions–factual to opinion based. For example, you could sequence it by just asking, “Please tell me three major changes in the village in last two decades”, and ask the following question “Please elaborate with examples”, also changes, etc. would elicit information that you wish to capture. Sometimes, you may have to repeat significant words of an answer can lead to further elaboration.
(viii) **Interpret Questions:** Throughout the interview, the researchers should clarify and extend the meanings of the interviewee’s statements to avoid misinterpretations on their part. For example, “You mean to say that ….” or “Does the expression….. cover what you have just expressed”, etc. This way of questioning allows the interviewees to confirm or disconfirm what has been interpreted by you as an interviewer.

(ix) **Avoid Sensitive Questions and Encourage a Free Rein But Maintain Control:**
It is advisable to avoid sensitive questions which may irritate or emotionally hurt the respondent, probably resulting in an interruption of the interview. The respondent may feel emotionally uneasy and start avoiding answers if the questioning is too deep. The researchers should be prepared to let the interviewees ‘travel’ as they like, but a rough checklist of ideas or areas the former only want to explore is useful. This can be achieved by respecting the informants’ opinions, supporting their feelings, or recognizing their responses. This can also be shown by the tone of voice, expression or even the gestures of the interviewer.

**Techniques for Analysis of the Data Collected from the Interview(s)**

(i) Identifying and clarifying contradictions
(ii) Creating linkages for deeper understanding of the topic under discussion/study
(iii) Separating factual information, experience, views/opinions, and feelings/emotion based data
(iv) Identifying points for further dealing and sources of information for acquiring necessary data
(v) Identifying need for supplementing data (from other sources of information, e.g. secondary sources, other respondents’ views, etc.)

You may sometimes have a chance to write or record the interview. You may make a detailed note after the interview is over and then go back to the notes to check/ensure that you haven’t missed any information that was provided by the respondent(s).

Before closing the interview, you need to summarise quickly and then ask the respondent whether s/he wants to tell or ask you anything more. There may be something which has been worrying them all along and is associated with vital information. Thank them for their time and cooperation.

2. **Survey Method**

This method may be planned on paper at an initial stage. The form and type of survey is chosen based on its purpose and use of data collected through this method. The number of respondents to be covered has direct implications on cost and time to conduct the survey.

Usually, a sample of population is chosen as a first stage of survey method followed by data collection from that sample on the different variables. Sampling is simply understood as ‘representation of the population’ for the topic under study in terms of units, elements, characteristics. The ‘representation’ and ‘generalisation’ works two ways for analysing and interpreting the data. Sampling is preferred in order to avoid any bias to maintain objectivity. Complete set of population is called ‘universe’. From the
universe (target population), the study population is identified followed by ‘sample’, which is to be covered under the survey. There are other types of sampling, such as random sampling, purposive sampling, stratified sampling, etc. Some types of surveys may get better response rate than others, and thus factor into the decision making process.

3. Focus Group Discussion (FGD)

Focus group discussions take place in a group of about eight to twelve persons, preferably from same social and economic background (caste/ community/ tribe, religion), educational background and sex/gender to discuss one topic of interest.

A group leader/ moderator asks questions/ facilitates discussion and tries to maintain complete natural flow of conversation in the group. Each participant is encouraged to express views and sharing feelings and to interact with others in the group while answering the moderator’s question. This expression is expected to enable a better understanding of the particular issues and people’s behaviour regarding the issues. The participants usually share common characteristics like age, sex, etc.

**Before the Discussion, During the Discussion, and After the Discussion**

Before discussion, visit different parts of the village; talk to local leaders and village residents; select suitable participants based on the criteria mentioned earlier; select the place of focus group discussion and find out a suitable time to meet. Inform each participant about time, venue and expected time for conducting FGD. Ensure appropriate seating arrangement. It is preferable to sit in a circle.

During discussion, interact with each participant. You are encouraged to ask question, discuss the response motivate every participant to respond to questions and in discussion and take notes. Before starting another question, take a stock whether information received from the participants is adequate. If not so, please probe the question for further information. Before concluding, take a cursory look at the notes to check/ensure that you haven’t missed any information that was provided by the respondent(s). Before closing the discussion, you need to quickly summarise and then ask the participants whether they want to tell or ask or clarify anything. Thank them for their time and cooperation.

After discussion, expand the field notes and identify necessary information to be collected from other sources as well as information that needs to be supplemented or checked through secondary data.

4. Participatory Learning and Action (PLA)

This is a method to collect necessary information through different techniques and with use of local materials: people’s participation is a key to this method. The repertoire of PLA is large and ever-evolving, such as, preparing maps, time lines (for season and related activities or historical information), transect walks, resource mapping, creating problem trees, Venn (Chapati) diagram, ranking activities, creating/preparing matrix, etc.
5. **Observation**

This is mainly used for generating qualitative data as well as for checking/verifying and confirming information (time taken for an activity, behavioural pattern of a person i.e. how a person responds to the situation, how a person interacts with others, etc.) from the field. It helps in creating systematic information on events and behaviour of the respondents or the persons/groups under the study as well as to verify certain facts/matters under study. It documents non-verbal expressions, such as, feelings/emotions. Prior to establishing rapport with persons in the field, the observation as a method helps in identifying informants as collaborators. The ‘descriptive observation’ takes place when it follows pattern of ‘what is to be observed, at what time and from which place’. Similarly, ‘focused observation’ took place when a particular detail need to be confirmed. When the researcher participates in some of the activities to observe, it is called as ‘participant observation’.

6. **Case Study: Poorest of the Poor (not less than 1000 words)**

A case study is an empirical/detailed inquiry on a contemporary phenomenon through a case or event/person. It is also known as ‘life-story’, when the life of a person under study is observed and investigated within its real-life context. A case study provides descriptive accounts of one or more cases, which is representative in a nature of a phenomenon, for example, poverty. A case study of a poor person can be investigated, documented and understood from different points of inquiry and perspective. Thus, a good case is more than just a description; it is actually an animated description that takes along a reader. It is information arranged in such a way that the reader is put in the same position as the case writer was at the beginning when s/he was faced with a new situation and asked to figure out what was going on. A description, on the other hand, arranges all the information, comes to conclusions, tells the reader everything and the reader really doesn't have to work very hard. This includes perception, emotions, analysis (systemic and situational), interpretation, suggestions for change, and represents a trend/pattern.

**Guidelines for selecting Poorest of the Poor in the Village:** To identify poorest of the poor, you may ask the Pradhan/ Sarpanch of the village, make local enquiries from the households through visits to Tola/ Hemlet and physically verify the following issues of poverty:

- Assets
- Education/ Skills
- Health history
- Debt
- Caste/ Social issues
- Access to Government Schemes
- Disputes
- Climate/ Natural
- Reasons for poverty
- Opportunities for coming out of poverty
• Role of Government
Based on the above information/observation prepare a case study.

Writing a Case Study

There are three basic steps in case writing: research, analysis, and the actual writing. You start with research but even when you reach the writing stage you may find you need to go back and research more information.

Depending on the case you are researching and writing, the sections of the case will need to be organized so that each type of information is in its own section and understandable to the reader. A case study can be structured in the following format:

1. Describe the problem or case question you want the reader to solve.
2. Organize the sections of the case:
   a. Introduction to the problem
   b. Background of the matter
   c. Government Policy – Can policy be changed and by whom?
   d. Local Opportunities
   e. Other sections of the case
   f. Conclusion

Photographs, charts/graphs (e.g. depicting changes over time) may also be uploaded for the case study.

The poverty is not only an economic concept; it includes socio-cultural, political and systemic/situational analysis. As poverty has become ‘chronic poverty’ in some cases, the analysis needs to go beyond poor living conditions and consequent deprivations. The following questions could be addressed in writing the case study:

(a) Why a poor (an individual/ a family) remain poor? Understand the cycle of poverty and its characteristics, what makes a person living with a problem of chronic poverty. Bring in human aspects of her/his life.
(b) Impact and effectiveness of systemic efforts for poverty alleviation
(c) Impact of social security programme on poor family
(d) Differentiate economic factors from the social, political and other factors that are at play for keeping the poor in poverty.
(e) Not having land as an asset (landlessness)–homestead and for cultivation–how it make poverty difficult and chronic.
(f) Poverty created different types of vulnerabilities. Whether social discrimination and marginalisation (in form of physical challenges/social stigma) make these poor more vulnerable and a victim of chronic poverty. Bring in human aspects of her/his life.

Based on this case study, poverty alleviation measures could be suggested.

Triangulation of Data for Report Writing
All the information—primary and secondary data—are inter-connected. A household data could be linked to village level data to complement and verify and thus it can be inter-linked/triangulated. A clear picture of the village under visit should emerge at the end of the village visit and also in the report/assignment. A picture that emerges through a ‘village schedule’ could be linked with household survey, either reconfirming results or bringing out contradictions of village data collected. However, this primary data would help in identifying policy issues, framing of policy/changes in existing policy and institutional mechanism and process implementation.

With the help of these tools, you would be able to collect information, perceive ground reality, make observations, learn to talk to people on different developmental issues and their lives etc. All the questionnaires put together would help you in creating a picture of the village under study mainly on the issues of land use, education, health care, and poverty alleviation programmes in the village. While writing reports you can check back and forth regarding the information that you have collected and check it again in case of discrepancy in the information.

At most places in the questionnaire the source of information or person to be contacted is mentioned. Wherever required, you may modify the questions; add necessary questions in order to get adequate details and precise information. Some inter-linkages are also mentioned in the footnote suggesting possibilities of triangulation of the data collected for report writing.

Some guidelines are provided for report writing by triangulation of data and different forms of presentation, for example table generation, using data for generating charts/graphs, identifying descriptive data, using secondary data/sources for creating a holistic picture of the village etc.

The issues covered in Sl. No. 23, 24, 25 and 26 of the Village Schedule for Socio-Economic study are to be studied cadre wise. Officer Traines are instructed to cover only one issue mentioned against their Cadre (details can be seen at Page No. 27).
CHAPTER – III

SOCIO-ECONOMIC STUDY AND CHECK LIST FOR PREPARING CASE STUDY ON POOREST OF THE POOR

Officer Trainee’s Name : 
OT Code : 
Date, Month & Year : 

A. VILLAGE SCHEDULE

1. Name of village with census code*: 
   Block with census code*: 
   District with census code*: 
   State with census code*: 

2. Demography

2.1 Total population of the village as per 2011 Census
   No. of male__________    No. of female__________

2.2 Rate of growth of population over different Censuses:
   Year  | Population | Rate of Growth | Sex Ratio
   1991  |            |                |
   2001  |            |                |
   2011  |            |                |

3. Location of the Village:

3.1 No. of hamlets:

3.2 Distance of the village from:

<table>
<thead>
<tr>
<th>Place</th>
<th>Distance (in Kms.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. District Headquarters</td>
<td></td>
</tr>
<tr>
<td>b. Block Headquarters</td>
<td></td>
</tr>
<tr>
<td>c. Nearest Tehsil/ RI Office/ Patwari Office</td>
<td></td>

* Fourteenth Finance Commission has awarded Rs.2,00,292.02 crore to be devolved to Gram Panchayats alone over the next five years with focus on delivery of the following basic services: Drinking water, Sanitation including solid and liquid waste management, Electricity, Roads, Playgrounds, Parks, Burial grounds/Crematoria, Other services devolved by the State laws.

\(^3\) Record information from *patwari*
5.1 Write numbers of families as *patta* holders in each category:
   a. Abadi
   b. Agriculture

5.2 Total land area irrigated
   a. Surface water (pond/ lake/ river etc.) facility for irrigation: Yes/ No
   b. If yes, get more details – source of water, how many hectares of land are covered, water supply during a year (months), etc.
   c. Irrigated Area (in hectare) ______ Unirrigated Area (in hectare) ______

5.3 Type of soil (write local name of the soil):
   alluvial/ black/ red/ laterite/ mountain/ sandy

5.4 Watershed development
   a. Any work on watershed project in the village, either by the government or the villagers themselves has undertaken: Yes /No
   b. If yes, write a note on it.

6. Agriculture and Allied Activities

6.1 Cultivable Land under:

<table>

9. Does Govt. procure any agriculture products? Yes/ No

9.1 Does the farmers get minimum selling price (MSP)? Yes/ No

10. Is there any co-operative society in the village? Yes/ No
   
   a. If yes, write name(s) and type(s) of the cooperative(s):
   
   b. What are its main functions:

---

\(^4\) Tenancy is a form of lease arrangement. The land owner gives land on lease for cultivation. Different variations of tenant arrangements exist, including sharecropping. There exists a large dependency of tenants on the land owners. In most of the states, oral tenancy is practiced. A landowner provides capital, equipment, and other assistance such as fertilisers and pesticides for cultivation of the farm; an agreement is devised for cost of labour, sharing of crops, cost of water provided for irrigation, and other costs. Reverse tenancy or capitalist tenancy is on rise, wherein rich and large farmers participate in the land lease market as tenants. This phenomenon is observed in the areas where irrigation and modern technology for agriculture is available; the rich farmers prefer to take land on lease rather than purchasing it.
11. Approximate number of livestock in the village:
   a. Grazing land actually available in the village: Yes/ No
   b. Diseases among livestock and details of veterinary services available at the village/ at nearby location

12. Is there any Micro/ Small Scale/ Cottage Industries in the village? Yes/ No
   a. If Yes, number and type of Micro/ Small Scale/ Cottage Industries …………..

13. Employment

16. Public Distribution System (PDS)

   a. How many Fair Price Shops (FPS) in the village
   b. Get total number of ration card holders
   c. How many ration card holders linked with Aadhaar?
   d. Visit at least one FPS and find out the following from the register and inspection report given to the FPS holder: (i) Opening Stock at the beginning of the month, (ii) Allocation for the month, (iii) Wholesale kerosene dealer bill No., (iv) Quantity actually received by FPS dealer, (v) Total Quantity of all items, (vi) Quantity distributed, (vii) Closing stock as per registers, Actual Ground balance at the time of inspection, (viii) Variations, (ix) Whether the stock-cum-price list board exhibited in prescribed format, (x) Whether the FPS dealer is maintaining work hours as per prescribed timings, (xi) Explanation of the Dealer/ dealer’s representation, and (xii) Whether the FPS dealer distribute ration by biometric authentication.

17. Sanitation

   a. Total number of households having access to toilets. Find out number of households regularly using toilets. Also find out reasons for not using toilet at home.
   b. Extent of sanitation coverage in the village.
   c. Garbage disposal system.
   d. Existing Drainage System: number of drains, number of open drains (nali), soak pits, leach pits etc. and are they cleaned regularly, etc.
   e. Swachh Bharat Mission promotes cleanliness, hygiene and elimination of open defecation – any plans or measures undertaken by the village? If yes, write a brief note.
   f. Solid and Liquid Waste Management System for overall cleanliness in the village.

18. Health Care

   a. Facilities at ANM Sub-centre
   b. Number of private practitioners/dispensaries in the village
   c. ANM visits regularly: Yes/ No
   d. Are villagers given free medicines from CHC/PHC: Yes/ No
   e. Integrated Child Development Services: Number of functional ICDS (Integrated Child Development Services) in the village

---

5 PDS is to ensure food security to all citizens, particularly poor people, by making available essential commodities of good quality at affordable prices every month, through fair price shops which are accessible/in nearby distance.

* If needed use a separate sheet of paper for writing the note
19. **Education**  
Name of School with UDISE code⁶:  

a. Number of sections by class (if the class is stand alone, has no section then enter 1)  

<table>
<thead>

The issues covered in Sl. No. 23, 24, 25 and 26 are to be done cadre wise. Officer Trainees are instructed to cover only one issue mentioned against their Cadre. The details are as follows:

Sl. No. 23: Integrated Child Development Services (Anganwadi Centre)
Cadre: Gujarat, Assam-Meghalaya, Himachal Pradesh, Manipur, Nagaland, Tamil Nadu, West Bengal

Sl. No. 24: Malnutrition
Cadre: Chhattisgarh, AGMUT, Jharkhand, Madhya Pradesh, Odisha, Jammu & Kashmir

Sl. No. 25: Study of a Self Help Group (SHG)
Cadre: Andhra Pradesh, Kerala, Telangana, Tripura, Uttarakhand, Bihar

Sl. No. 26: Panchayat
Cadre: Haryana, Karnataka, Maharashtra, Punjab, Rajasthan, Sikkim, Uttar Pradesh
23. **Integrated Child Development Services (Anganwadi Centre)**

(a) Look at ICDS register of last one year and find out the following:

i) Supplementary nutrition given to children below age 6 years and pregnant and lactating mothers– number of beneficiaries

ii) Immunisation details– number of children & name of vaccines; and number of pregnant women immunised

iii) Health check-up–whether chart of the children’s growth is prepared based, weight & height checked (number of children), nourishment

iv) Referral services to pregnant and lactating mothers provided

(b) Number of home deliveries in last year

(c) ASHA (Accredited Social Health Activists): Performance and impact

(d) Number of ASHA workers

(e) Get details about a scheme in the state that takes care of maternal mortality and infant mortality. Assess its performance in light of prevalent maternal mortality rate (MMR) and infant mortality rate (IMR). Get details–number of home delivery, number of delivery at hospitals, number of children born, number of neonatal died, measures undertaken, and its impact.

Please analyse the functioning and effectiveness of the Integrated Child Development Services as a system and write a report on the basis of your analysis in 1000 words.

24. **Malnutrition**

Malnutrition Audit: Taking a deep dive into the causes of malnutrition in rural India

Malnutrition comes in many forms – some more visible than others. Although stunting (low height for age) affects many more children in India than severe wasting (extreme thinness for height), the visible nature of wasting makes it more conducive to undertake a nutrition audit. Basically, in an audit, you should keep asking “why?” till you reach the root of the problem. Accordingly, the purpose of this exercise is to identify the root of the issue and not just a superficial glance/ analysis.

The malnourished child has to be the focus of your investigation, and you should be able to find out what went wrong, and how that can be redressed? Following are the broad guidelines for conducting a malnutrition audit:

(i) NRC: Visit a Nutritional Rehabilitation Centre (NRC) and interview at least 3 parents/caregivers and 2 staff of children undergoing treatment for severe acute malnutrition (SAM). Decide which child’s story you are going to look at in detail. Gather information on that child and the factors leading to that stage of malnutrition. Use a conversational style, and get the parents/caregivers to tell you how these listed drivers of malnutrition unfolded for their child. Also collect information on the family circumstances of the child such as income, education, assets, number of children, age of mother at delivery, etc.
Collect information from the NRC registers to obtain information on how children are identified and screened into the NRC, how long they typically stay and how many come back? Identify patterns, e.g. if some villages send more children, and whether there are some villages from which no children even come. Ask the NRC staff what mechanisms they employ to follow up the child in the village after discharge and what role the PRIs play in that?

(ii) Village: After interviewing the parents/ family members who is accompanying the child at the NRC, identify the child’s village and then make a visit to the village to assess the conditions related to the functioning of key supportive services for nutrition – the ICDS, the health centre, ASHA, ANM, ration shop – and also assess the overall situation with respect to social structures, panchayat functioning, sanitation and hygiene and employment opportunities. You can use the nutrition intervention framework* given below as a reference. Find out if there are earlier/ current instances of malnutrition in the mother or siblings, whether there are any special circumstances (like migration, single parent headed household, any persons with disability, landlessness, early marriage or any other factors) that make the family vulnerable. Also assess if there could be other such households in the village.

(iii) Analysis: After you have completed the interviews, the NRC visit and the village visit, come back and review the data from the NRC and the village you visited. Also find out overall what proportion of children in that district are severely wasted as per the NFHS-4 data, and whether in your analysis it emerges that there are certain areas from where SAM children are not being sent to NRCs. Find out if there are some systematic causes behind this.

Broadly, your analysis based on the NRC data, the district and block level MIS data, your visit to the children’s villages, and the data on the household should bring out the following insights in your report:

1. What are the major immediate and long term causes behind the child’s severe acute malnutrition? Examine both the immediate and peripheral causes and identify the most critical ones in this case.

2. How can some of the causes/ risk factors be addressed to prevent malnutrition? Are the concerned government agencies doing this effectively in the village?

3. How could preventive services and programmes be strengthened at village and GP level? Can vulnerable families be identified a priori and concerted action done to help them? What would be the criteria for the identification and how could the identification and response by local agencies be ensured?

4. What insights did you gain into how effectively systems at all levels coverage and deliver in ensuring that malnutrition is prevented, and if it happens, is effectively addressed? What are your suggestions for system strengthening at all levels such as village, GP, Block and district in this context?

5. Any death due to malnutrition/ hunger has happened in the recent past. If Yes, reasons lead to hunger death.
The report on Malnutrition including the analysis of the above questions should be of minimum 1000 words.

25. **Study of a Self Help Group (SHG)**

Study of a Self Help Group (SHG) – outcome and achievements:

a. Date of formation: _________ (derive years of existence)

b. Is this Group of mixed membership (males & females): Yes/ No

c. Periodicity of meetings: weekly/ fortnightly/monthly (see register)

d. Social composition of the Group: no. of SC, ST, OBC, general category, Muslims, other (specify)

e. Monthly contribution by members: _____ (in rupees)

f. Get details about financial performance: (Study these details to understand economic development that has taken place—Details of bank account, Income and expenses, profit or loss, Details of Profit/loss sharing)

g. Which income generation activity is undertaken

h. Number of members trained for income generation activity

i. Marketing facilities available to the SHG (shops, market sheds, transportation, etc.)

j. Find out about infrastructure facilities available to the SHG (manufacturing, processing, packaging, etc.)

k. Find out about availability of raw materials (which material—if more than one, mention all the names of the materials, is it necessary that the SHG has to buy the material from open market or the members can develop, in case material has to be bought, its market price, availability—regular/seasonal, etc.)

l. Availability of Skilled Labour—through trained members, in case skilled labour hired—proportion of trained members and hired skilled labourers, cost of hiring, etc.
m. Management aspects—who manage manufacturing, ensuring supply of raw materials, availability of labour, marketing, etc. need to be studied in detail

Please analyse the functioning and effectiveness of the Self Help Group as a system and write a report on the basis of your analysis in 1000 words.

26. **Panchayat**

(a) Structure of the Gram Panchayat

- Population of Gram Sabha:
- Number of elected members and their composition

</tbody>
</table>
• Flow of funds from state, how accessed?
• MGNREGS (since 2016); labour budget proposed, accepted, actually implemented.
• Other resources mobilized by Gram Panchayats including shramdan, donations in cash and kind, etc.

(f) Autonomy

- The level of real autonomy of the Gram Panchayat may be assessed especially in expenditure decisions, issue of administrative and technical sanction, final selection of beneficiaries and choice of works under different programmes. Also the control over the elected body by officials may also be highlighted.

(g) Effectiveness of planning and implementation of MGNREGA vis-a-vis guidelines

- with special reference to processes, inclusion, transparency, effectiveness

(h) Effectiveness of planning and implementation of GPDP vis-a-vis guidelines

- with special reference to processes, inclusion, transparency, effectiveness

(i) Capacity building efforts and their effectiveness

- need, provision, sufficiency, quality and impact

(j) Assessment of the functioning of elected representatives, especially elected heads with special reference to empowerment of SC/ST, women representatives.

(k) Assessment of the functioning of the Gram Panchayat as an institution

- Carrying out devolved functions and responsibilities and delivery of local level development
- Capacity
- Technical support available
- Resource mobilization
- Coordination with other departments and agencies
- Activation of Gram Sabha
- Synergy with SHGs and other people’s groups
- Accountability especially social accountability

(l) Perception of key stakeholders on the functioning of the Gram Panchayats

- SHGs, citizens especially those belonging to marginalized groups, local officials, senior officials, people’s groups and civil society organizations, political leaders, including MLA and elected representatives of the Panchayat especially women, SC/ST, etc.
(m) Special Factors to be Studied in Respect of Vth Schedule Areas

- PESA 1996 is applicable in the Vth Schedule areas. In such places the operationalisation of PESA needs to be studied in detail with special reference to the functioning of Gram Sabha and its exercise of powers conferred under Sec. 4 of PESA. Also how different State Laws and Rules especially relating to Excise, Mining, Revenue, Tribal Land Alienation, etc., have been made PESA compliant and actually implemented may be assessed? The implementation of Forest Rights Act (FRA) with special reference to the control over Non Timber Forest Produce (NTFP) may also be examined in detail.

Please analyse the functioning and effectiveness of the Panchayat as a system and write a report on the basis of your analysis in 1000 words.

27. Any specific issues/ best practices in the village? If yes, find out the reasons behind it and analyse.
B. HOUSEHOLD SCHEDULE

**Officer Trainee’s Name**: 
**OT Code**:

</tr>
</tbody>
</table>

15.1 Which source of credit is easy to obtain?

16. Any calamity or exigency in the family in the past few years: Yes/ No

16.1 How did the family cope with it?

17. SHG membership:

   (a) Are you a member of any SHG? Yes/ No
(b) If yes, get details—since when (month, year), for which purpose, how much savings, loan taken, loan used for, activities undertaken by the SHG, outcome, achievements (if any), etc.
(c) If no, why haven’t you become a member: never felt the need/do not find SHG relevant/migrate for a longer time in a year/other (specify)

18. Social participation

(a) Panchayat Meetings/Gram Sabha: Yes/ No
(b) Cooperative (credit, agriculture, milk, other): Yes/ No
(c) Other Institutions (get details)

19. Access to common property resources

(a) Forest lands, Government lands, Infrastructures, Community facilities and village water resources
(b) Change over last 5 to 10 years

20. Public Distribution System

(a) Do you buy items from Fair Price Shop (FPS): Yes/ No
(b) Which items you buy: food grains/kerosene/other goods/all of them
(c) Do you get regular supply of items every month: regular/ frequently irregular/ irregular
(d) If the supply is irregular, find out reasons:
(e) Their overall experience of the FPS (make a note):
(f) Is bio-matric authentication mandatory? Yes/ No
(g) Suggestions for effective functioning of FPS:
(h) Annapurna

i. Are you beneficiary of this scheme: Yes/ No
ii. How much grains are provided every month:
iii. Which grains are provided:
iv. Is the monthly provision provided regularly: Yes/ No

21. Ranking major problems of the village:

22. Perception about the welfare of his/ her family and Government’s role in it: Complete dependence on Government/ one time help/ Government keep away

23. Modern market penetration

(a) Marketing of the produce:

(b) Price received, difference compared to market price in the nearest town:

---

13 Under the scheme, 10 kg of food grains per month are provided free of cost to those senior citizens who, though eligible, have remained uncovered under NOAPS.
(c) Contract with the buyer, middle men:

(d) Did the family ever sell or got deprived of its land, cattle or other assets? Yes/ No

(e) Has the family ever thought of leaving the village and settling elsewhere? Yes/ No

If yes, get details/ reasons.

24. How they view the help of the Government to SC/ ST?

(a) Is it benefitting the people?
(b) How is present position about untouchability?

25. Any other aspect, the head of the household would like to mention either as a problem or suggestion.

Working of individual beneficiary oriented government scheme

26. Pradhan Mantri Awas Yojana (PMAY)

(a) Are you beneficiary of this scheme: Yes/ No
(b) If yes, which year:
   i) Name of the beneficiary:
(c) If no, rank in the waiting list:

27. Beneficiary of MGNREGA

(a) Have your family members registered under MGNREGA? Yes/ No
(b) If yes, how many you have worked under MGNREGA (in last one year):
(c) Which are the works undertaken?
(d) Have you ever worked at a site which is away from the village (more than 5 kms): Yes/ No/ Not applicable

   If yes, how many days you have been working away from village (more than 5 kms):
   Have you received extra wage for working at a distance (more than 5 kms away from the village): Yes/ No/ I’m not aware of this provision/ Don’t know

(e) Have you ever checked muster roll for your employment details: Yes/ No/ I’m not aware of this provision

(f) Payment of wages within: 15 days/ One month/ More than one month

(g) Mode of payment: Through Bank/ Cash/ Post Office/ Other
(h) Participation in Social Audit: Yes/ No/ I’m not aware of this provision/ It has never taken place in our village

(i) Have you ever received unemployment allowance: Yes/ No/ I’m not aware of this provision

(j) Problem faced (get details): Yes/ No

(k) Suggestions for improving work under MGNREGA:

28. National Social Assistance Scheme (NSAP)

(a) Indira Gandhi National Old Age Pension Scheme (IGNOAPS)
   i) Are you beneficiary of this scheme: Yes/ No
   ii) How much pension you get (in Rs):
   iii) Are you receiving pension regularly: monthly/ quarterly/ yearly
   iv) Mode of payment: Deposited in Bank/ Postal money order/ Other

(b) Indira Gandhi National Widow Pension Scheme (IGNWPS)
   i) Are you beneficiary of this scheme: Yes/ No
   ii) How much pension you get per month (in Rs):
   iii) Are you receiving pension regularly: monthly/ quarterly/ yearly
   iv) Mode of payment: Deposited in Bank/ Postal money order/ Other

(c) Indira Gandhi National Disability Pension Scheme (IGNDPS)
   i) Is any member of your family has benefitted of this scheme: Yes/ No
   ii) How much pension you get per month (in Rs):
   iii) Are you receiving pension regularly: monthly/ quarterly/ yearly
   iv) Mode of payment: Deposited in Bank/ Postal money order/ Other

(d) National Family Benefit Scheme (NFBS)\(^\text{14}\)
   i) Are you beneficiary of this scheme: Yes/ No
   ii) What amount did you get for the death of head of the family (in Rs):
   iii) Mode of payment: Deposited in Bank/ Cash

(e) Annapurna
   i) Are you beneficiary of this scheme: Yes/ No

29. Health

(a) Janani Suraksha Yojana (JSY)\(^\text{15}\)
   i.) Is any member of your family has benefitted of this scheme: Yes/ No

---

\(^{14}\) Under the scheme a BPL household is entitled to lump sum amount of money on the death of primary breadwinner aged between 18 and 64 years. The amount of assistance is Rs. 10,000/-.

\(^{15}\) This is a scheme under National Health Mission. Under this scheme, Rs 1400/- is provided per pregnancy up to the first two live births to all women in Low Performing States and Rs. 700/- is provided to the BPL families in High Performing States.
ii.) For how many children did you get this benefit:

iii.) What amount did you get for each birth (in Rs):

iv.) Mode of payment: Deposited in Bank/ Postal money order/ Other

(b) Immunisation details:

i.) Are all your children below 6 years immunised free of cost: Yes/ No

ii.) Where did you get them immunised:

iii.) Do you get medicines free of cost from CHC/ PHC: Yes/ No

29.1 Nutritional Status

i. How many children below the age of 6 years are there in the family

ii. Is any child identified as malnourished? Yes/ No

a. If Yes - How many? Indicate Name, age and gender

b. Who identified the malnourished child – Asha/ ANM/ Doctor/ Anganwadi/ Others (specify)

c. Has the child be given any remedial treatment? Yes/ No

d. If yes, indicate what treatment has been given, where and by whom and how long?

e. Has the child become normal. Are there any signs of relapse.

f. Has the mother been trained in cooking methods which preserve nutritional status?

30. Sanitation

(i) Do you have access to a toilet?

(ii) What is the type of toilet- Single Pit/ Twin Pit/ Septic Tank

(iii) Do all members of the household toilet use the toilet?

(iv) How do you dispose the waste water of the House- Kitchen Garden/ Soak Pit, Community soak pit, Drain

(v) How do you dispose the solid waste- Individual Compost Pit/ Community compost pit/ Vermi compost?

31. Drinking Water

(i) What is the source of drinking water for your Household- Handpump/ PWS/ Tap stand/ Well/ any other

(ii) If from Piped Water Supply scheme, then do you have a Household connection for drinking water

(iii) Has any water conservation measures undertaken in your village? Yes/No

(iv) If Yes, then what type of conservation measures have been undertaken

(v) Do you pay for operation and maintenance of water supply scheme? If yes, then how much?

32. Income Transfer Scheme

Are you beneficiary of any Income Transfer Scheme (PMKISAN/ Any other)? Yes/ No

33. Any other Schemes
REPORT ON
LAND ADMINISTRATION
CHAPTER – IV

ASSIGNMENT ON LAND ADMINISTRATION AND CHECK LIST FOR PREPARING CASE STUDY ON RETURNS FROM AGRICULTURE

INTRODUCTION

Keeping in view of the importance of land administration in the modern days, land administration assignment has developed to understand the real-scenario of land management and its administration in village level. Land administration is driven by state-specific laws and varies state to state. The assignment is providing a glimpse of land related issues faced by villagers and local revenue officials.

The objectives of the assignment are:

a. To gain familiarity and understanding regarding the land-administrative structures at the village and tehsil level;
b. To understand the real-scenario and issues involving land ownership, land records status, services etc. and
c. To appreciate the conditions under which various government functionaries work and the ways and means that may be adopted to improve quality of service delivery.

Report

a. Report on Land Administration

This report is to be submitted based on schedule for studying land administration. Some information including ownership, patta, etc. are already given in Socio-Economic Schedule that can be used here to understand the patterns of land ownership. The report in each section has two components – (i) Information, and (ii) Analysis. The focus is to be more on analytics. Report shall be in not less than 10000 words.

b. Case Study: Returns from Agriculture (not less than 1000 words)

The farmers in the country faces insecurities on many counts—uncertain weather, lack of safety net, soil degradation, availability of quality seeds, fertilizer, etc., concerned policies, market linkages, etc. In a given context, you need to explore sustainability of agriculture. The following points are relevant to write the case study:

(a) Overview–Area (district) related details, productivity, procurement policy of the government, major issues raised by the farmers, etc.

(b) Major crops grown

(c) Level of technology used
(d) Availability and accessibility to irrigation facilities and its linkages with productivity/consequent deprivation and negative impacts, farmer’s suicides,
(e) Awareness level of the farmer
(f) Yield rates, cost of cultivation, marketing of agricultural produce and net benefits to the farmers over the last decade
(g) Safety net available, compensation policy in case of natural calamity/climate change/crop insurance
(h) Whether cropping pattern changed over the decade. If so, the reasons?
(i) Analysis of rates of return in agriculture
(j) Interventions possible to improve returns

1. Village Schedule – The data collection for Land Administration study will be done in the same village which was taken for Socio-Economic study.
2. Household Schedule – To be asked from 5 households of the village who owns land (can be seen at Page No. 6).
1. VILLAGE SCHEDULE

1. Basic information

a. Name of the Village:

b. Patwari Circle:

c. Tehsil:

d. District:

1.1 No. of revenue Villages in the Tehsil/ Mandal:

1.2 Has Land ReSurvey been Conducted : Yes/ No

   (i) If ‘yes’, when was the resurvey conducted?
   (ii) If ‘no’, year of last Cadastral survey conducted

2. Structure of Revenue Administration at Tehsil (Write a note with functions and provisions. You can get it from the State’s Revenue Manual/ Revenue Code/ Survey and Settlement Manual and compare it with ground realities).

   a. Discuss with Revenue Inspector (RI) regarding his/ her role and append your observations on the Role of Revenue Inspector and provisions under which he acts?
   b. Study the role of RI in various land related activities .Visit the spot for each of these activities and prepare detailed note:
      i. Demarcation of property/ measurement of parcel
      ii. Enquiry regarding land dispute/ role of RI in land dispute matter
      iii. Role in updating/preparation of records for granting government land (Patta) to the needy people/landless

   c. How is the interaction of RI with Village accountant and Tehsildar?
   d. Apart from the revenue works, what are the other works he/ she deputed in last 6 months?
   e. What steps need to be taken for better revenue and land records management by the Revenue Inspector (RI)?
   f. Write a successor note on role and responsibilities of RI/ Tehsildar with respect to the concerned revenue unit. It shall cover specific aspects of
problems of the revenue villages including vulnerability to disaster, pendency, service delivery and any aspect that needs personal attention.
g. Your overall impressions on the institution of Circle Officer/ Tehsildar, efficiency of the system, need for speedy delivery and better definition of rule, devolution of authority and responsibility.

3. Common Property Resources (CPR) of the Village

Write a note on their availability in terms of land area and water source, produces used by the villagers, usage rights enjoyed by sections of the people, average collections of itemised produce per week (e.g. minor forest produce, fuel wood, fodder, etc.), shrinkage of CPR in past 30 years due to various reasons etc. Find out present status, whether it is encroached, if yes, to what extent? Whether the SCs/STs are able to access and avail benefits of the CPRs? Whether the CPRs are encroached, if yes, to what extent? Whether the CPRs are encroached, if yes, to what extent? Whether the SCs/STs are able to access and avail benefits of the CPRs? Categories of CPR (grazing land/pasture land, forest land, village sites, common water resources, common water resources, common water resources) are available in the village and where encroachment were maximum.

4. Digital India Land Record Modernisation Programme

4.1 Computerization of land records:

a. Computerisation of land records completed in the Village: Yes/ No
b. If yes, are land owners able to get computerised copy of
   1. Record of rights (RoR)–Jamabandi or Khatiyan: Yes/ No
   2. Fees charged to get a copy of RoR: in Rs.
   3. Is manual issuance of RoRs completely stopped:
      If not stopped, find out the reasons:
   4. Is digitally signed Computerised copy of RoR providing to the villagers: Yes/ No
   5. If Yes, from where they get the copies? Online/Tehsil Offices/e-seva centres/panchayat office

4.2 Digitization of Maps:

a. Digitization of maps completed in the Village: Yes/ No
b. If No, find out the reasons:
c. If Yes, is spatial data (maps) verified with textual data (RoR): Yes/No
d. Is digitized maps available online: Yes/ No
e. Is computerized maps and RoR integrated: Yes/ No
f. After partition of land parcels, are computerized spatial records automatically updated? Yes/ No

16 Common property resources constitute all such resources which are meant for common use of the villagers, such as village pastures and grazing grounds, village forest and woodlots, protected and unclassed government forests, waste land, common threshing grounds, graveyard land, water resources including drinking water arrangements, watershed drainage, ponds and tanks, rivers, rivulets, water reservoirs, canals and irrigation channels. It is widely held that CPRs still play an important role in the life and economy of the rural population.
4.3 Re-survey under DILRMP

a. Modern survey started in the village: Yes/ No
b. If yes, find-out involvement and role of gram sabha/aam sabha/land-owners
c. If No, find out the reasons.

4.4 Computerization of Registration

a. Is Registration process computerized or manual?
b. How much time does it take to complete registration?
c. How much days it take to get the registered copy of deed?
d. Who does data entry in registration office? PPP model/ department people/ hired agency
e. Is stamp paper used or online facility available to pay registration fees?
f. Is SRO is linked with mutation department? Yes/ No
g. If No, then find out reasons

4.5 Integration of land records and registration

a. Is registration department integrated with land record office? Yes/ No
b. Is online mutation available? Yes/ No
c. If No, then how mutation takes place?
d. Is mutation and survey department integrated? Yes/ No

4.6 e-governance initiatives

a. Any e-governance scheme regarding land records launched by the state government: Yes/ No
b. If yes, what is the name of the centre: Kiosks/ Sugam Centre/ Tathya Mitra Kendra/ Any other
c. If Yes, what are the revenue services are provided from these e-centres:
d. Is it under PPP? Who are the partners?
e. Are any CSOs involved with District Administration in spreading awareness about computerised and online services: Yes/ No
f. Are the villagers aware about computerized system of land records management: Yes/ No
g. From where the villagers getting all kind of land related services: Panchayat/ RI Office/ Patwari Office/ Tehsil
2. HOUSE HOLD SCHEDULE

1. Name of the Head of the Household:

2. Caste status: SC/ ST/ OBC/ General/ Others Sub-Caste:

3. Which type of card the family has: APL/BPL/ Antyodaya

4. Aadhar card: Yes/No (of each family member)

5. Number of livestock owned:
   (a) Total income from livestock:

6. Ownership of land and type of use:

<table>
<thead>
<tr>
<th>Type of Land (Agricultural/orchard/grassland/fallow/built-up)</th>

</tbody>
</table>

9. Assets owned by the family (tick appropriate answer)
   Land/ House/ Cattle/ Vehicle/ Other (television, refrigerator, jewellery, cell phone, goods) and estimated annual income if any from assets

10. Total Annual Income of Household (in Rupees) - Rough estimate based on your visit and interaction:

11. Debt status of the household:

<table>
<thead>
<tr>
<th>Sources of credit</th>
<th>Amount</th>
<th>Interest</th>
<th>Security</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Moneylender</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(b) Bank</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(c) Other Sources</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

11.1 Which source of credit is easy to handle?

11.2 Any calamity or exigency in the past few years: Yes/ No

11.3 How did the family cope with it?

12. Information about land records

   (a) Do you have the land record of land owned by you in your own name? Yes/ No
       If not, then why are you not interested in registration of your property by your own
   (b) Do you know when the last survey was conducted? (year)
   (c) Should any other details be included in the format of RoRs? Yes/No
       Specify if any
   (d) Did you get the computerized copy of RoR (ownership records)? Yes/No
   (e) What is the average time (in days) taken for getting copy of RoR? What is the user fee charged for getting computerized RoR?
   (f) Do you know the processes followed by the officials to update land records after buying or selling?
(g) Are your plots are well depicted in the village revenue maps? Yes/No
   If no, then find the probable reasons.
(h) Is there any conflict between RoR and maps (Area or plot no etc.)? Yes/No
(i) Any problem with boundary fixation? Yes/No
   if yes, find out the reason.

13. Processes of land record updation
   (a) Is Registration process computerized or manual?
(b) How many days does it take to complete registration?
(c) What is the average time taken for normal mutation? Is it longer than the prescribed deadline for the state if any. If it takes more time, then find out the reasons for delayed mutation process.

14. Grievances Redressal
   (a) Did you find any errors in your land records? Yes/No
      If yes, did you apply for correction? Yes/No
      To whom it is applied?
   (b) If Survey/Settlement has been completed recently in the village, did you had any role in that as owner?
   (c) Do you have any grievances on land records management, patwari/tehsildar/district administration, land titles, cadastral maps and boundary fixation etc.? If so specify.
   (d) Did you approach any revenue official – when and whom?
   (e) Is your grievance redressed? If yes, how long (in days) did it take? If No, how long has it been pending now?

15. E-governance/ service delivery
   1. From where do you get any kinds of records related to land? Panchyat Office/ Tehsil Office/ e-seva kendra
   2. Are e-governance centres available in your locality? Yes/No
      If Yes, How far from your place?
      If ‘Yes’, then find out the questions from ‘3-7’
   3. Do you have trusts on the e-governance services provided in the centre? Yes/No
      If no, then find out the reasons.
   4. How much time does it take to get services? Half day/ Within a Day/ 5 day/ Within a Month/ More than a month
   5. If the village still follows manual system, how many days it took to get any copy of a Certificate from nearest Tehsil office? In a week/ In a month/ More than a month
   6. Do you feel that the e-governance services are better/convenient than the earlier manual systems? Yes/No
   7. Did you encounter middlemen or rent seeking? Yes/No
      How did you deal with it?
CHAPTER – V
GUIDELINES FOR REPORT WRITING

While collecting data—primary and secondary, the report writing is planned. Which part of the schedule will give what type of output and how that information is to be used, etc. are a few of the points that are taken into consideration? Therefore, it is important to look at each question of the schedule; identifying source of information (selection of informant/ respondent) as well as quality of data collection is equally important. All these factors are closely related to each other and any researcher has to work back and forth for these linkages.

After data is collected, analysis and interpretation of data are two critical stages. Which information will be used for which issue to be appropriately presented needs constant attention while analysing and interpreting data. Simultaneously the structure of the report is prepared.

Data Analysis and Interpretation

- Both the schedules—village and household—are organised in such a way that at the end of each section/question, you can present a pan picture of each sector/village level institutions and its functioning. Each question is section in itself with necessary sub-questions (see example table 3).

- The close-ended questions are codified and then quantified for presentation in form of numbers followed by per cent. The interpretation is based on the per cent, which indicate proportion and composition.

- The answers of the open-ended questions will be descriptive; they need to be either used as quotes (presented in to inverted comma) or could be quantified. Some quotes need to be identified which conveys necessary meanings/ interpretations about the situation or issue under study.

- Triangulation of data and cross-verification between village schedule and household schedule will help you in interpreting data—to describe status, identify trends or pattern regarding change over 5–20 years, newly emerging challenges, and success/failure of the initiatives taken by the government as well as non-government agencies. Based on this analysis, you would be able to draw learning, experiences and policy related issues.

- Some questions presented in the table form could be filled and presented in tabular form or chart/graph. Some output tables are presented here as an example.
Example of Output Tables

- You may begin with brief introduction/background of the village. This will be descriptive, based on District Gazetteer or as you have heard from the village residents.

- Some questions/tables of the Schedules could be replaced in your report, as presented below:

  Example Table 1: Location of the Village

<table>
<thead>
<tr>
<th>Sl.</th>
<th>Location</th>
<th>Distance (in kms)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>
<td>District Headquarters</td>
<td></td>
</tr>
<tr>
<td>b.</td>
<td>Block Headquarters</td>
<td></td>
</tr>
<tr>
<td>c.</td>
<td>Nearest Bus Stop</td>
<td></td>
</tr>
<tr>
<td>d.</td>
<td>Nearest Railway Station</td>
<td></td>
</tr>
<tr>
<td>e.</td>
<td>Nearest town (could be more than one places)</td>
<td></td>
</tr>
<tr>
<td>f.</td>
<td>Nearest market place (could be more than one places)</td>
<td></td>
</tr>
<tr>
<td>g.</td>
<td>Nearest branch of a bank (could be more than one places)</td>
<td></td>
</tr>
<tr>
<td>h.</td>
<td>Nearest post office</td>
<td></td>
</tr>
<tr>
<td>i.</td>
<td>Nearest Sub-centre for health care (mention if not within village)</td>
<td></td>
</tr>
<tr>
<td>j.</td>
<td>Nearest Community Health Centre</td>
<td></td>
</tr>
<tr>
<td>k.</td>
<td>Nearest Public Health centre</td>
<td></td>
</tr>
<tr>
<td>l.</td>
<td>Nearest grain storage facility</td>
<td></td>
</tr>
<tr>
<td>m.</td>
<td>Nearest Fire Station Office</td>
<td></td>
</tr>
</tbody>
</table>

To present an overview of the village on its social and economic situation, the following table could be generated:
Example Table 2: Social Composition

<table>
<thead>
<tr>
<th>Sl.</th>
<th>Community/Social classification</th>
<th>No. &amp; % to total population of households</th>
<th>Population</th>
<th>No. &amp; % of households to total population having BPL card</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>SCs (Name of sub-castes)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>STs, if any (Name of tribe/ there may not be a tribe)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Other Backward Classes (write name of caste/ communities)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>General category (write name of caste/ communities)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Muslim</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>Christian</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Sikh</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8</td>
<td>Jain</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>Jain</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>10</td>
<td>Any other (Some sects, etc.)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- If you wish to write about ‘impact of non-availability of infrastructure facilities in the village’, you can combine data from the Village Schedule (VS) and Household Schedule.

- If you wish to present educational facilities in the village in a tabular form, you can use the table shown below:
Example Table 3: Educational facilities in the village

<table>
<thead>
<tr>
<th>Facility in Elementary School</th>
<th>Available (Y/N)</th>
<th>Condition (good/ok/poor)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compound wall</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Class Room</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Toilet</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Water tank</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Drinking water facility</td>
<td></td>
<td></td>
</tr>
<tr>
<td>No. of Teachers</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Shed for mid-day meal</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MDM served regularly</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Below this table, you can present your analysis regarding functioning of an elementary school and educational scenario in the village.

- As there is a section on poverty alleviation programmes through SHG and micro-finance as a strategy, you may give an overview of existing SHGs related details, as shown in the table below. For triangulation of data, you can combine questions from HHS. This would be quantitative as well as qualitative information. Some quotes of the family members (respondents of HHS) could also be incorporated.

Example Table 4: Overview of SHGs in the village

<table>
<thead>
<tr>
<th>Sl. No.</th>
<th>Name of SHG</th>
<th>Years of existence</th>
<th>Directly linked to Govt. scheme (if yes, write name of the scheme)</th>
<th>Total number of members</th>
<th>Total collection (in rupees, on last date of the previous month, year)</th>
<th>Revolving fund (loan given to the members, other details)</th>
<th>Major activities undertaken in the last financial year</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.</td>

</tr>
</tbody>
</table>
Format for preparation of report

Details of report are presented here.

I. Arrangement of contents:
   The sequence in which the village study report material should be arranged and bound should be as follow:
   1. Cover Page & Title Page
   2. Abstract
   3. Table of Contents
   4. List of Tables
   5. List of Figures
   6. List of Symbols, Abbreviations and Nomenclature
   7. Chapters
   8. Appendices
   9. References

The table and figures shall be introduced in the appropriate places.

II. Page dimension and binding specifications:
   The dimension of the village study report should be in A4 size. The cover should be printed in black letters and the text for printing should be identical.

III. Preparation format:
   **Cover Page & Title Page**—Title, details of assignment, name of the presenter and cadre, to whom the report is submitted, month and year of submission.

   **Abstract**—Abstract should be one page synopsis of the village study report (including research methodology, important findings, suggestions for policy) typed double line spacing, Font Style Times New Roman and Font Size 14.

   **Table of Contents**—The table of contents should list all materials presented in the report in a chronological manner. Respective page numbers are to be mentioned. One and a half spacing should be adopted for typing the matter under this head.

   **List of Tables**—The list should use exactly the same captions as they appear above the tables in the text. Respective page numbers are to be mentioned. One and a half spacing should be adopted for typing the matter under this head.

   **List of Figures**—The list should use exactly the same captions as they appear below the figures in the text. Respective page numbers are to be mentioned. One and a half spacing should be adopted for typing the matter under this head.

   **List of Symbols, Abbreviations and Nomenclature**—Each of these items is mandatory with necessary explanation. Standard symbols, abbreviations etc. should be used. One and a half spacing should be adopted or typing the matter under this head.
Chapters:

1. Socio-Economic Study

The chapters may be broadly divided into five parts:

(i) Introductory chapter with basic information about the village and district

(ii) A chapter on socio-economic profile of the village. It should include the following:
   - Agriculture and agrarian situations
   - Employment
   - Public Distribution System
   - Sanitation
   - Health
   - Education
   - MGNREGA

(iii) A chapter on any one of the following issues as per cadre allocation (details can be seen at Page No. 27):
   - Integrated Child Development Services (Anganwadi Centre)
   - Malnutrition
   - Study of a Self Help Group (SHG)
   - Panchayat

(iv) A chapter on assessment of poverty alleviation programmes

(v) Conclusions and Policy Suggestions from the perspective of ‘good governance’ and ‘inclusive development’, people’s participation.

(vi) Case Study on ‘Poorest of the Poor’

2. Report on Land Administration

The chapters may be broadly divided into five parts:

(i) Land Ownership and Tenancy

(ii) Revenue Inspector and its role on revenue administration

(iii) Status and challenges of Land Records Modernization. It should includes Revenue Service Delivery System and awareness of online land records management system.

(iv) Conclusions and way ahead

(v) Case Study on ‘Returns from Agriculture’ (please see chapter-IV at page no. 37)

- The main text will be divided into several chapters and each chapter may be further divided into several divisions and sub-divisions.
- Each chapter should be given an appropriate title.
- Tables and figures in a chapter should be placed in the immediate vicinity of the reference where they are cited.
- Footnotes should be used sparingly. They should be typed single space and placed directly underneath in the very same page, which refers to the material they annotate.

Appendices – Appendices are provided to give supplementary information, which is included in the main text may serve as a distraction and cloud the central theme.
List of References – The listing of references should be typed 4 spaces below the heading “REFERENCES” in alphabetical order in single spacing left – justified. The reference material should be listed in the alphabetical order of the first author. The name of the author/authors should be immediately followed by the year and other details.

IV. Body of the Report

Introduction
Focus on the issue you identified for the in-depth study, its objectives and relevance. Organize your ideas.

Locale of the study
It should contain location, demography, socio-political and cultural significance of area if any and rationale for selecting the area.

The Problem/ Issue
This includes nature and extent of the problem, its impact on public administration or service delivery. If problem is concerned with availability of fund/ infrastructure, don't bury it. If the concern is service delivery, highlight them. Consequences of lack of infrastructure facilities and identifying implementable policy measures from the perspective of ‘good governance’ and ‘inclusive development’.

Data Analysis
Analyse the data collected and arrive at central theme through data interpretation. Synthesize your ideas along with role of State. Use single theme paragraphs. This technique will increase the clarity of your Report. Analyse the theories and concepts involved.

Conclusion
The details of the solutions if any you are proposing and highlight your learning and its probable application.

Appendices
Appendices should be numbered using numerals, e.g. Appendix 1, Appendix 2, etc. Appendices, Tables and References appearing in appendices should be numbered and referred to an appropriate place just as for chapters. Appendices shall carry the title of the work reported and the same title shall be made in the contents page also.

List of References
The listing of references should be typed 4 spaces below the heading “REFERENCES” in alphabetical order in single spacing left – justified. The reference material should be listed in the alphabetical order of the first author. The name of the author/authors should be immediately followed by the year and other details.
Word Limit of Report Writing

<table>
<thead>
<tr>
<th>Sl. No.</th>
<th>Report</th>
<th>Word Limit</th>

A typical illustrative list has given below relates to the citation example quoted above.

**Submission Guideline:** Data [Village Schedule and Household Schedules (20 nos.)] will be submitted through “SARGAM” and Reports (Socio-Economic Report, Land Administration Report and Two Case Studies) will be submitted through “GYAN” Portal.

**Important Note:** Kindly note that Plagiarism test of the report will be done through “Turnitin” software before evaluation of the report.

**REFERENCES (Example)**

GUIDELINES FOR SUBMISSION OF VILLAGE STUDY ASSIGNMENT

TWO IMPORTANT INSTRUCTIONS:

i. The village for this assignment should be selected within one month of district training.

ii. Attachments like land revenue, MGNREGA, PMAY, PDS should be attached with data collection for village survey.

Contact B.N. Yugandhar Centre for Rural Studies

- For Submission of Report
  Shri Niranjan Kumar Sudhansu
  Centre Director

Annexure-1

Guidelines on Partnership between Gram Panchayats and SHG Networks

Background

Panchayati Raj was given a constitutional mandate in 1993. Around the same time SHGs of women started emerging, mostly supported by NABARD. But, over the years not much synergy has developed between the institutions of local government and the institutions of the poor. As panchayats have been assigned the twin functions of economic development and social justice, performing these functions, naturally requires a close partnership with community based organizations, particularly of the poor.

Recognizing that there is need for an effective and functional working relationship between Panchayats, especially Gram Panchayats and SHGs of women, in particular, the Village Organizations (VO), the NRLM framework was amended to incorporate provisions for bringing about a formal relationship between local governments and the organizations of the poor.

Since the nature, powers and authority of Panchayats vary vastly across the country a single set up prescriptions would not be valid to operationalize the partnership. Therefore, NRLM launched pilots in six States to work out the modalities based on field trials in different situations. The initial results of the pilots have shown that while the contours of the partnership would be context specific, it is mutually beneficial and results in positive outcomes.

Immediate Context

On realizing that, though MGNREGA has been beneficial to the poor, the involvement of the poor in deciding their priorities and demanding work and planning for assets directly enhancing their livelihoods was limited, the Intensive Participatory Planning Exercise (IPPE) was launched. This for the first time, gave the central role to SHGs and its federations in the preparation of the Labour Budget. Since bulk of the works under MGNREGA are being planned for and implemented by Gram Panchayats, this has brought about an operational linkage.

With the devolution of substantial funds to the Gram Panchayats by the Fourteenth Finance Commission (FFC), States have embarked on the preparation of Gram Panchayat Development Plan (GPDP), converging of the resources over which Gram Panchayats have command in different State situations. And MGNREGA provides substantial resources to Gram Panchayats. As the focus is on participatory planning, it is necessary to bring in the SHG networks so that the poor get their due in local development.
Objectives

The objectives of the partnership between Gram Panchayats and the SHGs are:

- To empower the poor to know, to demand and to access their rights and entitlements.
- To include the poor and vulnerable sections of the community in the local development process and enable them to benefit from it.
- To strengthen local democracy making the Gram Panchayats responsive and accountable.
- To engender local level development and make it participatory and inclusive.
- To strengthen Gram Panchayats through citizen engagement.

The Rationale for the Partnership

- Strategically, the SHGs and their federations would learn the workings of democratic power and influence decisions through participatory planning. This would make them aware of their rights, entitlements and enable them to avail of opportunities. It would help them develop locally relevant norms for collective decision making, especially in the Gram Sabhas, which in turn could promote public action for common good.
- Practically, it would help the SHGs get direct benefits from the local plan, particularly work and livelihoods from MGNREGS, basic services from the FFC grant, basic needs from Pradhan Mantri Awaas Yojana, Swachh Bharat Mission, National Social Assistance Programme and so on.
- From the point of view of Panchayats, it will broaden and deepen democracy by enhancing participation and strengthen direct democracy. Engaging closely with the poor on equal terms will enhance the legitimacy and status of the Gram Panchayats.
- Further, Gram Panchayats, can utilize the SHG networks to strengthen Gram Sabha, particularly to improve local level planning, use them for outreach, extension and service delivery as well as feed-back.

Thus, the partnership would be mutually beneficial and needs to be pro-actively facilitated.

Principles Underlying the Partnership

The partnership between Panchayats and the SHGs should be on the basis of clear principles. They include:

- Acceptance of Panchayats as institutions of local self-government.
- Recognizing SHGs and their federations as autonomous institutions of the poor with clear rights and functions. Their autonomy should not be infringed in any manner by the Panchayats under any circumstance.
- Both panchayats and the SHGs have a strong right to know the details of functions, responsibilities and activities of each other through sharing of information and holding consultations and dialogues.
• It is mandatory to work together but on a transparent and rule based system, on the basis of norms and criteria.
• To make the partnership functional and smooth, linkages need to be worked out –structural linkages, financial linkages, development linkages and so on.

Planning Process to Realize the Partnership

SHGs may be formally involved in and integrated into the process of Gram Panchayat level planning as suggested below:

• SHGs and their federations should discuss their poverty and livelihood status on the basis of SECC data and participatory assessments. They should develop a profile of poverty in the Gram Panchayat.
• Thereafter they may develop a matrix indicating the main causes and solutions.
• Based on this, in consultation with the Gram Panchayat a poverty reduction plan may be prepared as part of the GPDP, drawing resources from MGNREGS, FFC grants and other funds mobilized by the Gram Panchayat. This plan could also converge with other antipoverty programmes being implemented within the Gram Panchayat area. This could be further strengthened by persuading the Gram Panchayat to locate basic services and infrastructure in the poorer areas.
• In addition, SHGs and their federations should be pro-actively involved in the costless development components of GPDP, like access to nutrition, health and education, providing the last link in delivery of different public services and addressing social evils.

Role of Gram Panchayats

1. Facilitate and support in the conduct the participatory identification of the poor, their social mobilization and then the institution building as SHGs and Village Organizations.
2. Use the SHGs and their federations consciously and formally to strengthen Gram Sabha through informed participation after prior discussions within SHGs on needs and priorities.
3. Use the SHGs and their federations actively in the local level planning process, specifically in matters related to poverty reduction. Their services may be utilized:
   — for social mobilization;
   — for dissemination of information;
   — as members of participatory planning teams;
   — for conduct of PRA exercises;
   — for consideration of the Participatory Assessment of Entitlements (PAE), Participatory Poverty Assessment (PPA) and Participatory Identification of Poor (PIP) as baseline information for planning;
   — for incorporation of the Micro Credit Plan (MCP) and vulnerability reduction plan in the Development Report presented to gram sabha;
   — for participation in the mahila sabhas and ward sabhas preceding gram
sabha.

4. Gram Panchayats should be encouraged to prepare a poverty reduction plan as part of their development plan and in this, the demands of the SHGs need to get priority.

5. Assign specific roles to SHGs and their federations in MGNREGS - identification of workers, demanding work, preparing Labour Budget, etc.

6. Use the SHGs for out-reach, particularly in behavior change communication, dissemination of technologies for development, transmission of development messages and conveying information on developmental programmes and schemes to the target groups.

7. Utilize the SHGs for community based monitoring, especially of service delivery and performance of developmental interventions with specific reference to Sustainable Development Goals (SDGs).

8. Entrust responsibilities for implementation of programmes to SHGs and their federations through community contract as locally appropriate.

9. Use SHGs, as agencies for operation and Maintenance (O&M) of utilities and assets with freedom to collect reasonable user charges.

10. Develop Community Resource Persons (CRPs) from among the SHGs to carry out different developmental tasks on proper remunerations.

11. Lease out ponds, common lands, etc. to the SHGs for livelihood activities.

12. Use SHGs participatory assessments and studies like gender status, status of children, poverty analysis, status of destitutes, etc.

13. Use SHGs for local campaigns for health, education, sanitation, etc.

14. Use the social capital of SHGs for launching drive against social evils like alcohol and substance abuse, manual scavenging, child marriage child labour, trafficking of women, etc.

15. Use the SHG to run Common Service Centers, especially to deliver IT based services and for financial inclusion.

16. Allow SHGs to conduct a social audit.

17. Facilitate SHGs work closely with elected women representatives.

18. Outsource tasks related to governance to SHGs on proper payments.

19. Build capacity of SHGs to perform the tasks assigned to them.

20. Provide space in the Panchayat Office to the Village Organization.

21. Provide funds to support SHG activities.

22. Take-up advocacy on behalf of SHGs with different developments.

23. Involve SHGs and their federations in Functional Committees and other Gram Panchayat level committees.

24. Prepare a partnership plan with SHGs and their federations.

25. Facilitate joint meetings of the Panchayat with SHG federation for discussing the demands of the SHGs, at least once in a quarter.

**Role of SHGs and their Federations**

1. Access support from Gram Panchayat into the social mobilization of SHG formation and for identifying the left out and vulnerable sections of the community to bring them into SHGs.

2. Work with Gram Panchayats for conducting Participatory Identification of Poor (PIP) and get the process endorsed in gram sabha.
3. Participate actively in gram sabha with consolidated demands as agreed beforehand in SHGs and SHG federation especially in accessing work and assets under MGNREGS and benefits from GPDP.
4. Help Gram Panchayats to conduct the Gram sabha by helping them in publicity, facilitating discussions and documentation.
5. Perform the tasks suggested by Gram Panchayats, which are beneficial and acceptable.
6. Participate in all Functional committees of Gram Panchayats.
7. Take up the service delivery responsibilities entrusted by Gram Panchayats such as midday meals, house to house collection of taxes, solid waste management, operation and maintenance of piped drinking water supply, e-services, etc. by claiming appropriate fees
8. Participate in community based monitoring mechanisms of Gram Panchayat project implementation.
9. Work with Gram Panchayat for accessing the common resources of Gram Panchayats (like fish ponds, vested land, common properties, market yards etc.) as livelihood base for SHGs.
10. Help GPs to conduct gender status study and ensure the gender needs of the community are reflected in the local Plan.
11. Access information from Gram Panchayat and disseminate amongst SHG members on issues related to available government services and schemes.
12. Conduct Participatory Assessment of Entitlements (PAE) in each SHG and consolidate at VO and GP level and prepare the Entitlement Access Plan (EAP) at Gram Panchayat.
13. Actively involved in GPDP process to get the demands of SHGs included.
14. Take the lead for preparing Gram Panchayat Poverty Reduction Plan in association with Gram Panchayat and other stakeholders and ensure the adequate resources from Gram Panchayat and other line departments for implementing it.
15. Prepare a plan of action to implement the partnership.
16. Coordinate the joint meeting with Gram Panchayats on fixed dates.
17. Enrol elected Women representatives as members of SHGs and groom them as Community Resource Persons.
18. Hold regular interaction with Panchayats on developmental issues.
19. Provide information on the functioning of SHGs in respect of joint projects.
20. Co-ordinate with Gram Panchayats while preparing micro plans and seek formal financial support.
21. Add Panchayat-SHG Partnership as a separate agenda in all regular meetings of SHGs and Federations to discuss, review and monitor participation in planning and implementation and obtaining of benefits by members. The agenda items may include - Gram Sabha, GPDP, Poverty free Gram Panchayat, MGNREGS, Swachh Bharat Mission. work in Functional Committees of Gram Panchayats, Village Health Plan, ICDS, etc.

**Facilitation of the Partnership**

**Role of State Government**

State Governments have to actively facilitate the partnership as suggested below:

1. Bring about geographical congruence between VOs and Gram Panchayats i.e. a
single Gram Panchayat should contain one or a whole number of VOs.
2. Instruct Gram Panchayats to provide office space for VO within the Panchayat office. If existing space is not sufficient MGNREGS could be used to create the space.
3. Issue order enabling SHGs to benefit from common property under the control of Gram Panchayat like ponds grazing lands, etc.
4. Lay down procedure, as part of Gram Panchayats level planning, to get a poverty reduction plan prepared in which SHGs are given the central role.
5. Co-opt CRPs from the SHGs into planning teams for Gram Panchayat level development plan which would include MGNREGS.
6. Formally assign responsibilities to SHGs in assisting Gram Sabhas to beneficiaries of anti-poverty programme on the basis of clear norms.
7. Ensure that all eligible elected women representatives are made members of SHGs.
8. Utilize elected women representatives especially, as internal CRPs, to focus on developing the partnership between the Gram Panchayat and the SHGs and their federations.
9. Conduct joint campaigns of Panchayats and SHGs for health, sanitation, etc.
10. Include functionaries of the SHGs and their federations in the Functional Committee of the Gram Panchayat dealing with poverty reduction and women issues.
11. Give formal membership in all the Village Level Committees to the VO.
12. Create a forum for regular interaction of the VO with the Gram Panchayats at least twice a year in which the VO would explain the needs and Gram Panchayat would formalize its developmental support. This should be before the finalization of the Gram Panchayat Development Plan.
13. Set up Joint committees consisting of the leaders of the VO and Gram Panchayat to oversee the Partnership.
14. Conduct joint training of elected representatives and VO leaders to explain the need for partnership and the modalities.
15. In the Schedule V areas, SHGs may be specially involved in strengthening Gram Sabhas and their capacity suitably built up.
16. A Committee may be set up at the Block level for trouble shooting if required.

**Role of SRLMs**

In addition to supporting the State Government in the roles indicated above, SRLMs needs to do following:

1. Task an officer of the BMMU, DMMU and SRLM specifically to facilitate and oversee the partnership.
2. Develop capable Community Resource Persons or Local Resource Groups at Federation/Gram Panchayat level to provide necessary training to all stakeholders.
3. Develop Block level Master Trainers.
4. Put in place a common State Resource Team for GPDP and MGNREGS.
5. The consolidated Entitlement Plan at block level needs to be kept in MIS for its periodic verification and monitoring.
6. Conduct necessary training and capacity building to the SHG leaders and GP leaders with the help of well-developed IEC materials.

7. Train all elected representatives (especially elected women representatives) on NRLM and its functioning and importance on working together with SHGs.

8. The BMMU may review and monitor the partnership activities and report to DMMU and SMMU periodically. The State Level Steering committee may examine the report and guide and advice the SRLMs and the Panchayat Raj department.

Follow-up Action by State Governments

1. States may issue detailed guidelines to actualize the partnership. This may be operationalized immediately in all the Intensive/Resource Blocks. In the new Blocks which are brought under NRLM, this activity should start from the beginning. While the institution building of SHGs take place the relationship with the Gram Panchayats should be clearly explained to work out a meaningful and symbiotic relationship.

2. States are free to take technical support from the National Mission Unit of NRLM and/or the National Resource organization, viz., Kudumbashree of Kerala.

3. States may develop Beacon Panchayats in Resource/Intensive Blocks where the partnership is actualized as envisaged. They could function as Schools of Practice for other Gram Panchayats and VO to learn from.

4. The State level Steering Committee constituted for the GPDP may be tasked with the responsibility of coordinating this exercise as by suitably incorporating SRLM.

Expected Outputs and Outcomes

1. Expected Outputs

Gram panchayat-SHG Partnership initiatives taken up should lead to clear and measurable outputs. Following is an indicative list of outputs:

i. Increased access of SHG families and communities to individual entitlements, community services, public goods and social security.
   For example: MGNREGS job card, MGNREGS work and assets, access to social security pensions, proper functioning of schools and anganwadis, mid-day meals. ensuring entitlements under Right to Education Act and Right to Food Act, increased immunization, reduced incidence of communicable diseases, etc.

ii. Regular functioning of partnership platforms and active community cadres. For Example: Regular meeting of Functional Committees and the level of participation of SHG members in the committees, number of SHG members working as community cadre for Gram Panchayat, etc.

iii. Increased participation of women in Gram Sabha and various institutional and development committees like Anganwadi Mothers. Committee. School Management Committee, Village Health Committee, Water and Sanitation Committees, etc.

iv. Gram Panchayat Poverty Reduction Plan, jointly prepared by the Gram Panchayat with VO, in every Panchayat.

v. Services entrusted by the Gram Panchayat to the SHGs for delivery.
vi. Number of Elected Women Representatives as CRPs.
vii. Funds provided by the Gram Panchayat to SHGs and their federations.

2. Outcomes

In the medium to long term, certain outcomes are expected. These include:

i. Increased contribution from Gram Panchayat to local economic development, reduction of poverty and antyodaya.
ii. Increased ability and sensitivity of elected representatives on issues of poverty and to work with community institutions.
iii. Sustainable functioning of joint institutional platforms to plan and monitor partnership activities.
iv. Enhanced ability and confidence of women to access public institutions and offices, including elected positions in the local governments.
